Right, that's what I thought. Thanks for confirming.
Ken, would you mind calling me at some point today, at your convenience?

We received a pre-application from Texas some time ago that is being reviewed internally by both HQ and R6 UIC and ORC.

Can you also confirm that you haven't received an "application" from Texas? It is my understanding that the railroad commissioner gave approval to the commission to file the application, but it seems to me that they need to finish discussions regarding the pre-application before filing the application. Same meeting notes indicate that Texas has already filed their formal application.

Keri – Confirmed, we have not received even a Class VI pre-application from Oklahoma.

Ken—just following up again on the notes being circulated from a meeting with Dr. Nance saying that Oklahoma has filed a class VI primacy application. Brandon assured me that he had no knowledge of such application but since it apparently came from Dr. Nance would you please confirm? Thank you—

Keri

Ken & Brandon, a bunch of people who attended a meeting with Dr. Nance yesterday recorded in their meeting notes that Dr. Nance said that Oklahoma had submitted a Class VI application and that it is under review by EPA. I can't imagine that Oklahoma suddenly submitted an application so I'm telling people that there must have been a miscommunication, but I thought I'd give you a heads up. If it turns out I'm wrong and something DID get submitted, please let me know.

Many thanks,

Keri Powell
